Why **Grades** Matter?

Plywood
Grades

MDF
Grades

HDF
Grades

*Grades help you pick the right wood alternative for specific needs. **Higher grades** mean more durability, better finish, and **resistance**.*

Plywood **Grades** Types

BWP (Boiling Waterproof)

Fully waterproof, handles direct water exposure.

MR (Moisture Resistant)

Withstands humidity, but not direct water contact.

BWR (Boiling Water Resistant)

Resists water to some extent but isn't fully waterproof.

Uses.....

BWP: Kitchens, bathrooms, and outdoor furniture.

MR: Bedrooms, living rooms, and indoor panelling.

BWR: Kitchen cabinets and laundry areas.

MDF **Grades** Types

Interior Grade

Suited for dry indoor environments, cost-effective but not moisture-resistant.

Exterior Grade

Can handle humidity better, making it suitable for semi-moist areas.

Uses

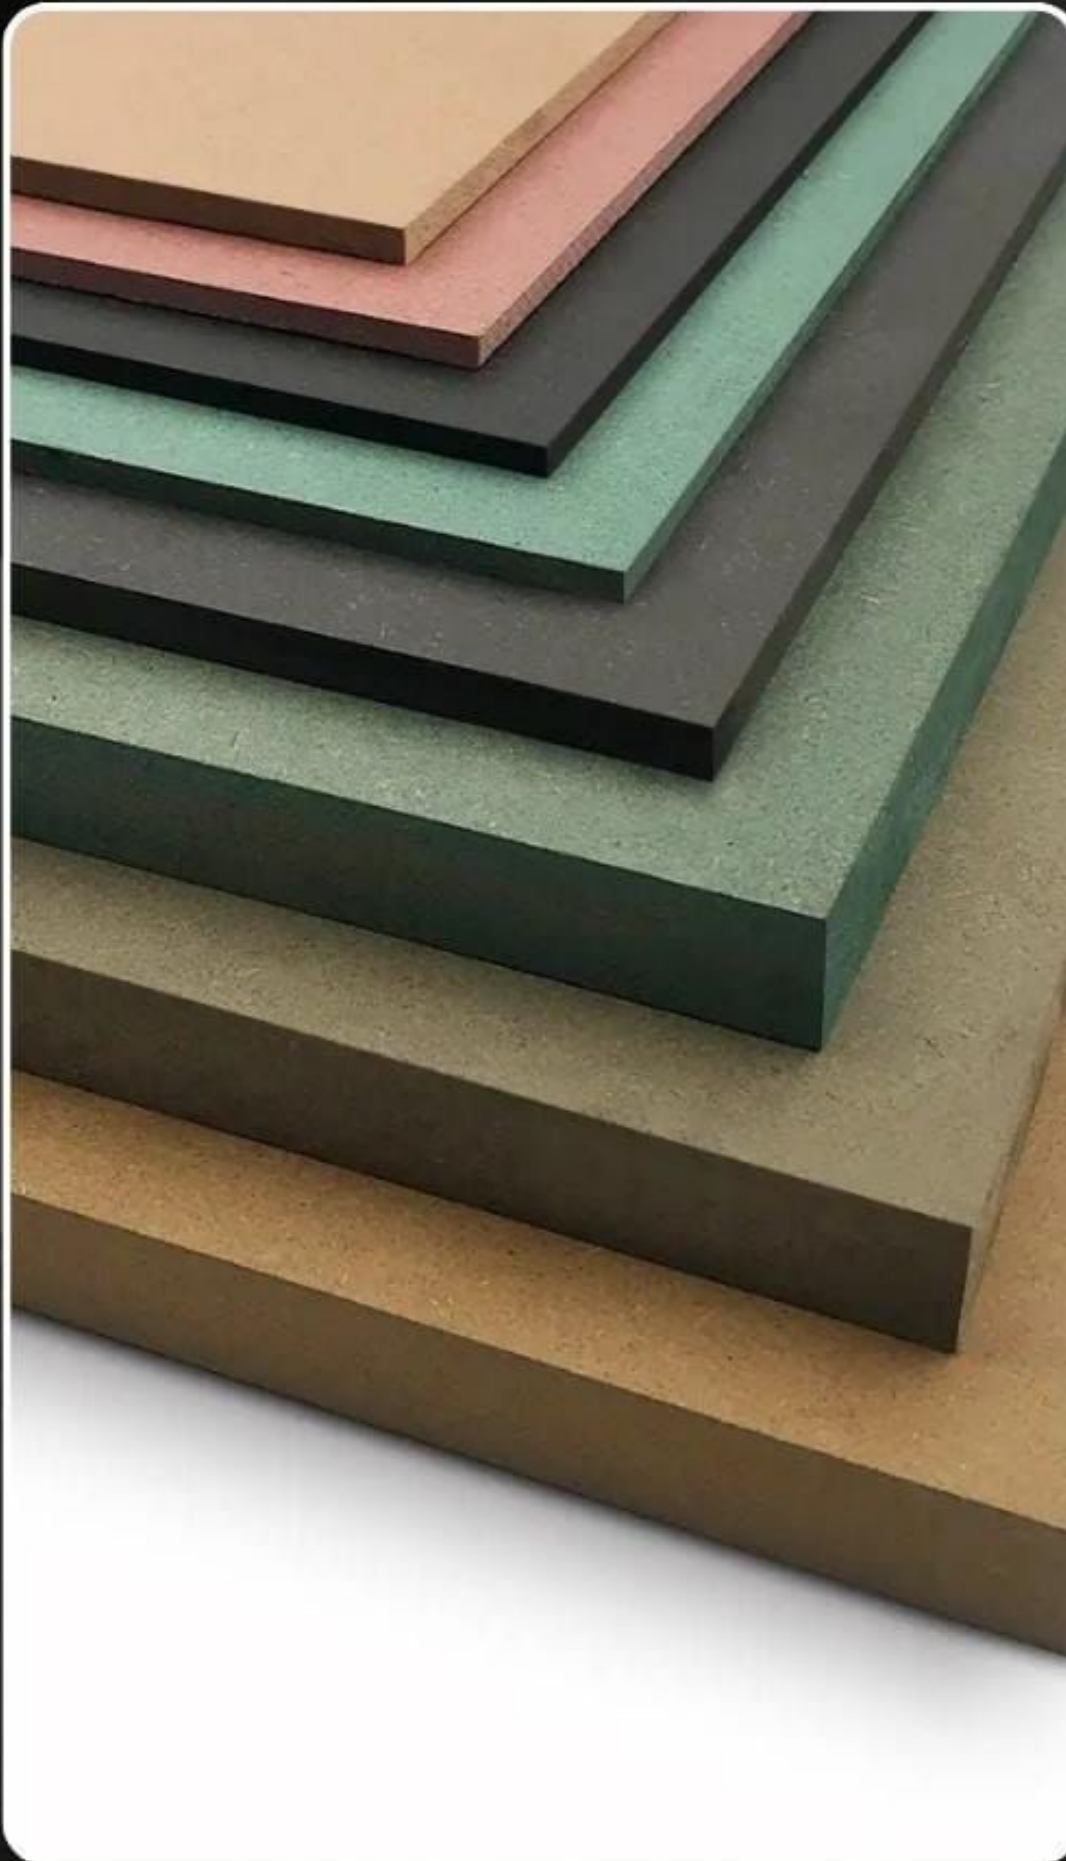

Interior Grade: Ideal for indoor furniture, shelves, and decorative pieces.

Exterior Grade: Great for cabinets in semi-moist spaces like laundry rooms (avoid water exposure).

HDF **Grades** Types

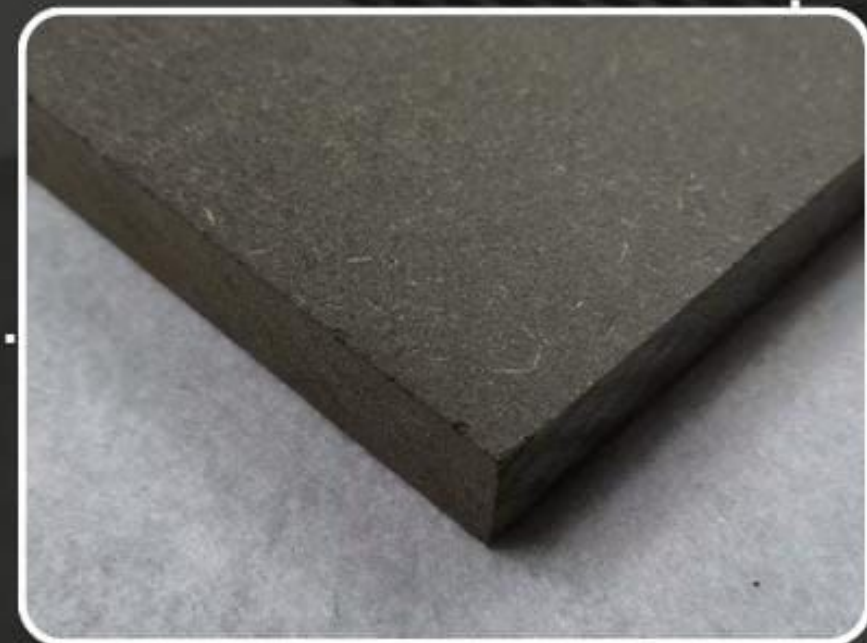

Club HDF: Suitable for dry furniture, wall panels, and shelving.
BWP HDF: Perfect for humid spaces like kitchen cabinets and bathroom storage.

Club HDF

Durable and dense, but sensitive to moisture.

BWP-grade HDF

Moisture-resistant, with enhanced durability for humid areas

Uses
